Why choose Heskins LLC?

We are not a “product mover”, we develop, produce and customize the World’s most extensive and reliable range of self-adhesive anti-slip materials. Our efforts are lead by constant customer focus and aiming to ensure that we remain your company of choice, we can only achieve this by remaining true to our values of quality and price.

What we can offer resellers...

Heskins LLC actively helps any resellers to achieve both greater sales and higher margins. We can rebrand our products by offering retail packaging, printed cores, back print liners and sample cards in your own branding.

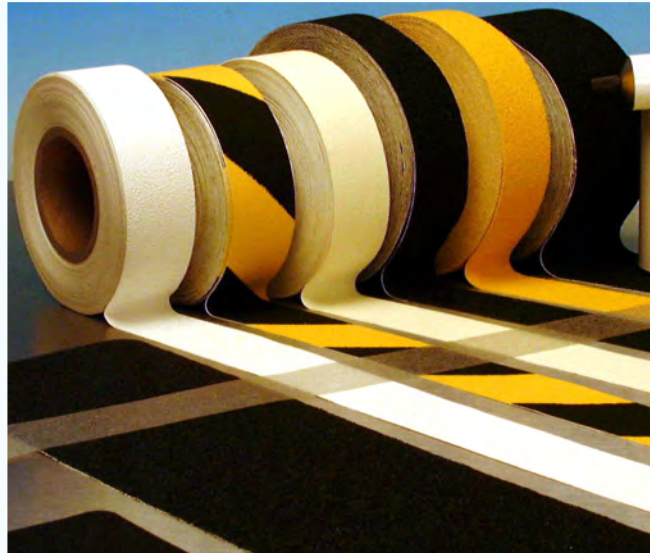

NON SLIP SOLUTIONS for transportation

SELF ADHESIVE, ANTI-SLIP MATERIAL
MADE TO ANY SIZE, SHAPE OR COLOR

HESKINS

ANTI-SLIP SOLUTIONS

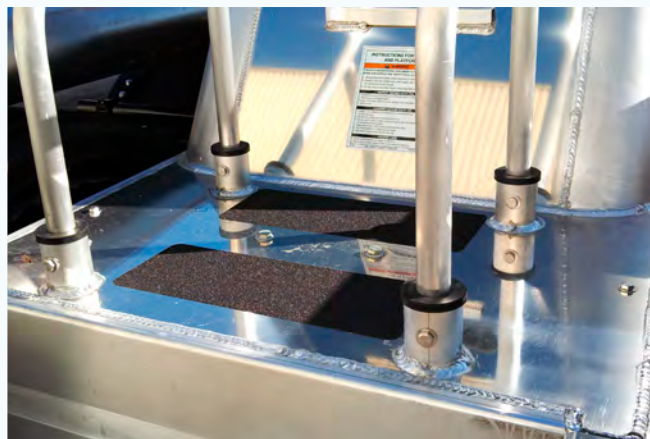

NON SLIP SOLUTIONS for transportation

Benefits to you

Whether using our leading product range or a tailored solution, you can be assured that all products offer:

- Indoor and outdoor all-weather performance
- Die-cut packs for greater production efficiency
- High traction safety and longevity for extreme applications
- Highly effective solutions to minimize workplace accidents
- Quick and versatile installation

Die cut shapes make a neat and durable non slip tread on steps and fenders

Most Heskins non slip materials can even be submerged making them ideal for use on boats and launching trailers

Colors

Our range is the widest possible choice of color available. We think we have encompasses the vast majority of shades that would normally be chosen. Dependent on volume, we want to be able to offer you the ability to choose your color; any Pantone® shade is possible, dependent on volume. All colors shown on our sample cards are ex- stock and available for immediate delivery.

Special sizes

Our post-production conversion facilities enable us to produce products that are suitable for your needs. Our abrasive range can be slit to any width from 3/4" (on special request 1/2") to 46". Our non abrasive range can be slit to any width from 1/2" to 54".

We can accommodate any +/- tolerances as required. Any roll length can be offered up to 300ft.

Abrasive or Non-abrasive

Heskins LLC produces material in both abrasive and non-abrasive formats to offer you the widest choice.

Our trained staff are willing to help you find the anti slip material you require.

Heskins' abrasive range encompasses fine grades all the way through to our extremely heavy duty X-coarse that has no equal. Heskins LLC made the decision to pioneer the development of high performance non-abrasive products.

Our R&D in the field of non-abrasive products has yielded products free from minerals yet possessing previously undreamt of levels of coefficient of friction and also the World's first symmetrically patterned anti slip material, 3418.

Wherever you walk - we'll be there

Safety Compliances

While traveling on public highways, the Department of Transportation (DOT) has jurisdiction. However, while loading and unloading trucks, OSHA regulations govern the safety and health of the workers and the responsibilities of employers to ensure their safety at the warehouse, at the dock, at the rig, at the construction site, at the airport terminal and in all places truckers go to deliver and pick up loads.

A shocking one in six of all lost-time work injuries result from slips, trips and falls. Nearly 65 percent of these are same-level falls. Protecting the worker from harmful events such as dangerous falls is the Occupational Safety and Health Administration (OSHA). Employers must know and comply with OSHA's regulations.

Greater durability, increased product performance, extended warranties and longer guarantees are all expected from today's engineering providers.

You can reduce the risk of slips and falls by applying our anti-slip tapes to walkways, steps, handrails and any substrate where there is risk of falling,

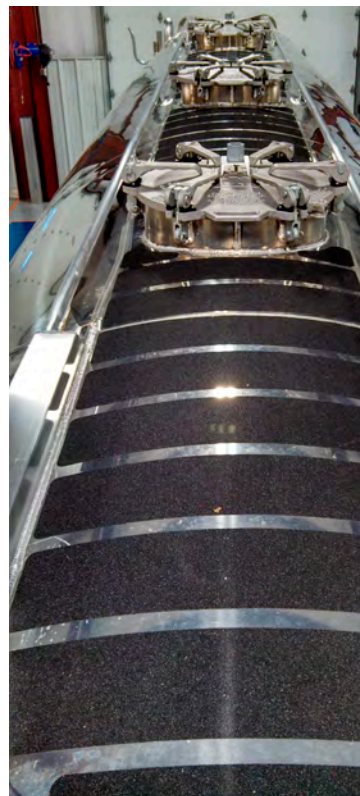

Not only do our products supply a key safety aspect to the operator, but they can also be used to ensure the safe delivery of packages shipping consignments by helping secure loads and preventing shifting during transit.

Customer Commitment

Leaving nothing to chance or relying upon outdated adhesives and cutting technology Heskins LLC decided some years ago to commit its business to exceeding customer expectations through the pursuit of excellence in the design and manufacturing of non-slip solutions.

Working in partnership with Heskins LLC, businesses can expect:

- Total flexibility and personal service
- Superior product performance and quality
- Tailored solutions to exceed your customers expectations
- Significant production cost savings
- 12 months total confidence guarantee
- Worldwide delivery in 5 days

Adhesives are resistant to many chemicals and can be used on tankers
